- React.Js
- JavaScript
- HTML
- CSS
- Express.Js
- Node.Js
- MongoDB
- Redux

## EDUCATION

### BACHELOR OF ENGINEERING

Mechanical Engineering from Rajiv Gandhi Proudhyogiki Vishwavidyalaya  
2014 - 2018

### POST GRADUATION DIPLOMA IN COMPUTER APPLICATION

Makhanlal Chaturvedi University, Bhopal  
2020 - 2021

### SECONDARY SCHOOL

Gov. Higher Secondary School  
2013 - 2014

### HIGH SCHOOL

Sarswati Higher Secondary School  
2011 - 2012

## CAREER OBJECTIVE

Results-oriented Mechanical Engineer with a strong foundation in web development using the MERN stack. Seeking to leverage my engineering background and programming skills to create innovative and user-friendly web applications.

## INTERNSHIP

### FULL-STACK DEVELOPER INTERN

During my Edureka internship, I immersed myself in MERN stack projects, mastering HTML, CSS, JavaScript, Node.js, Express.js, React, and MongoDB. I learned to create UI design with React, and database management. This experience honed my skills and deepened my understanding of full-stack web development.

## PROJECTS

### MOVIEX

MOVIEX is a website which has movies and tv shows like other OTT platforms. It is created using React.js, Redux, JavaScript, XML, SCSS.

### PORTFOLIO SITE

I've crafted a dynamic portfolio site with React, HTML, CSS, and Bootstrap, ensuring compatibility across desktop and mobile displays. It adeptly highlights my projects and abilities for a compelling user experience.

### THE BUBBLE GAME

Designed and implemented an interactive Bubble Game using JavaScript, HTML, and CSS. Created dynamic random bubbles on the screen, challenging players to click on them for points. Strengthened front-end development skills, honed JavaScript proficiency, and enhanced user engagement techniques.

### WEATHER APPLICATION

Weather application is a web based project which shows weather of different cities. It is based on JavaScript, HTML & CSS

### NETFLIX CLONE

Netflix clone is a web based project that is based on HTML and CSS
